Kota Bogor, Jawa Barat 16161
Operational Hour:
Monday – Friday (10.00 – 22.00)

Partner & Customers

Most Recognizable Solution

Intelligent Recruitment & Online Assessment

Managed databases and Online Tests are still new in 2010. There are not many products that allowed Consulting Companies to use and fulfill their needs such as Online Vacancy, Candidate Apply, Intelligent Screening, Candidate Scoring & Ranking, Personality Test, Competency Test and provide custom reporting.

Teman Digital has partnered with The Jakarta Consulting Group and Proxis Consulting Group to build products to assist their Consulting journey.

Electronic Source For Goods and Services

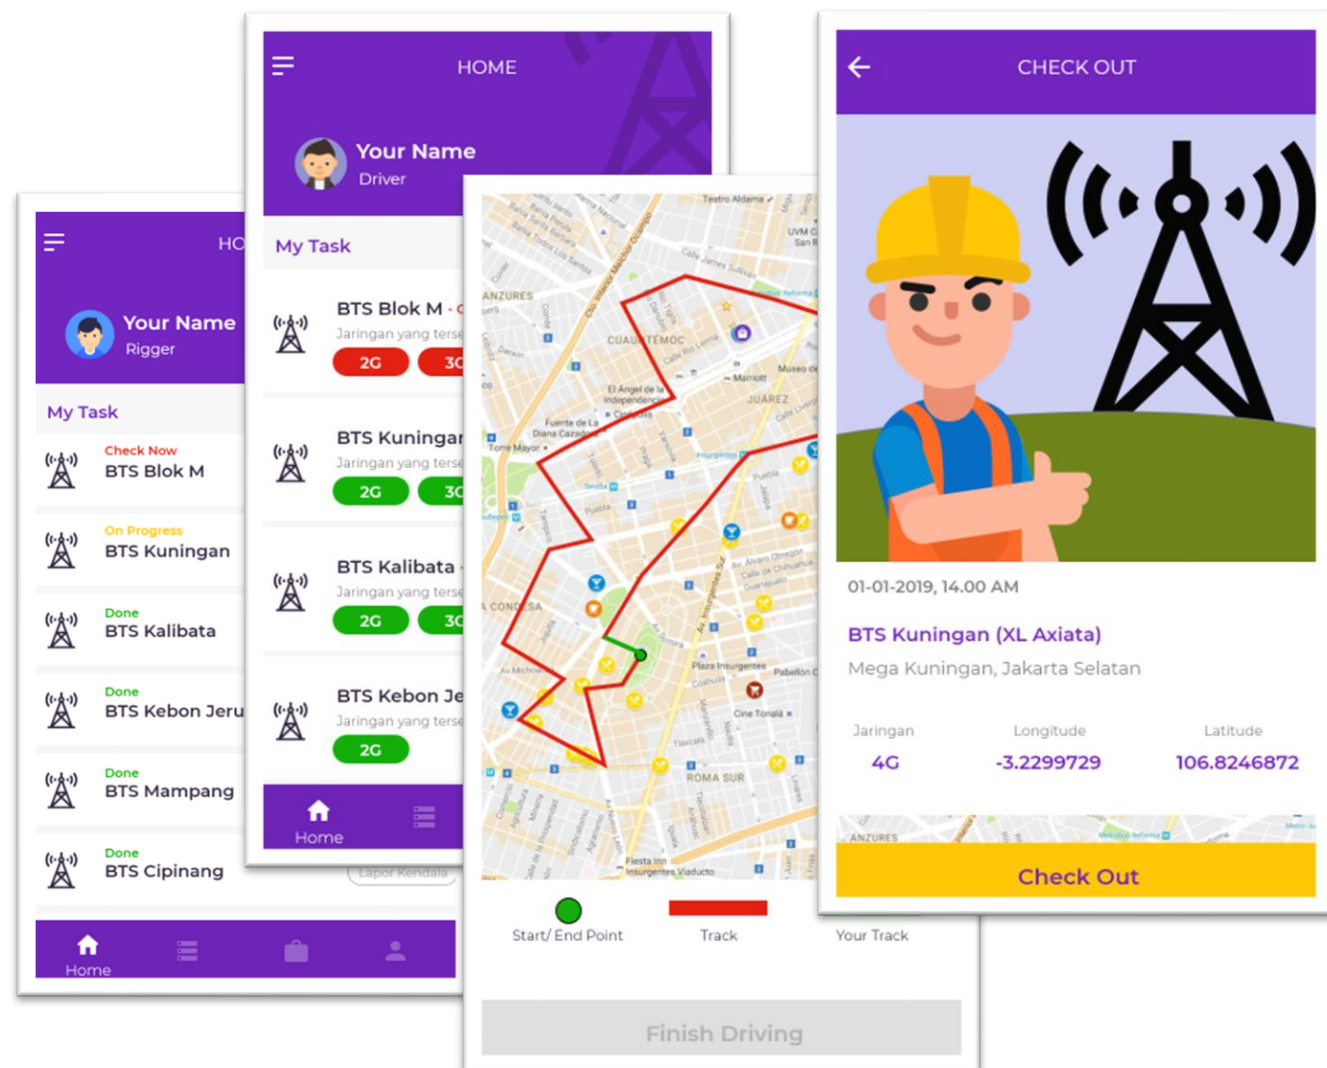

Standardization of price limits for goods and services is needed to keep the prices of goods and services under control. The dictionary of prices for goods and services from each supplier in the form of a book needs to be digitized in order to achieve ease and speed in searching for data so that operational activities can be more effective.

For this reason, a one-stop service apps is needed for each supplier in order to be able to monitor the selling price of goods and services sold, which in turn will be able to analyze the data by the government.

Rigger & Driver BTS Testing App

The activity of installing, repairing or maintaining equipment on a BTS Tower located in a remote area needs to be monitored for correctness.

Because, in addition to activities that are not recorded, validation is difficult, and work activities that can be made false reports by field workers, an application is needed to record every activity of field workers starting from the daily task list, checkin on the tower, checklist on checking activities, maps to check coverage or check radius to absenteeism or leave request so that work can be monitored properly

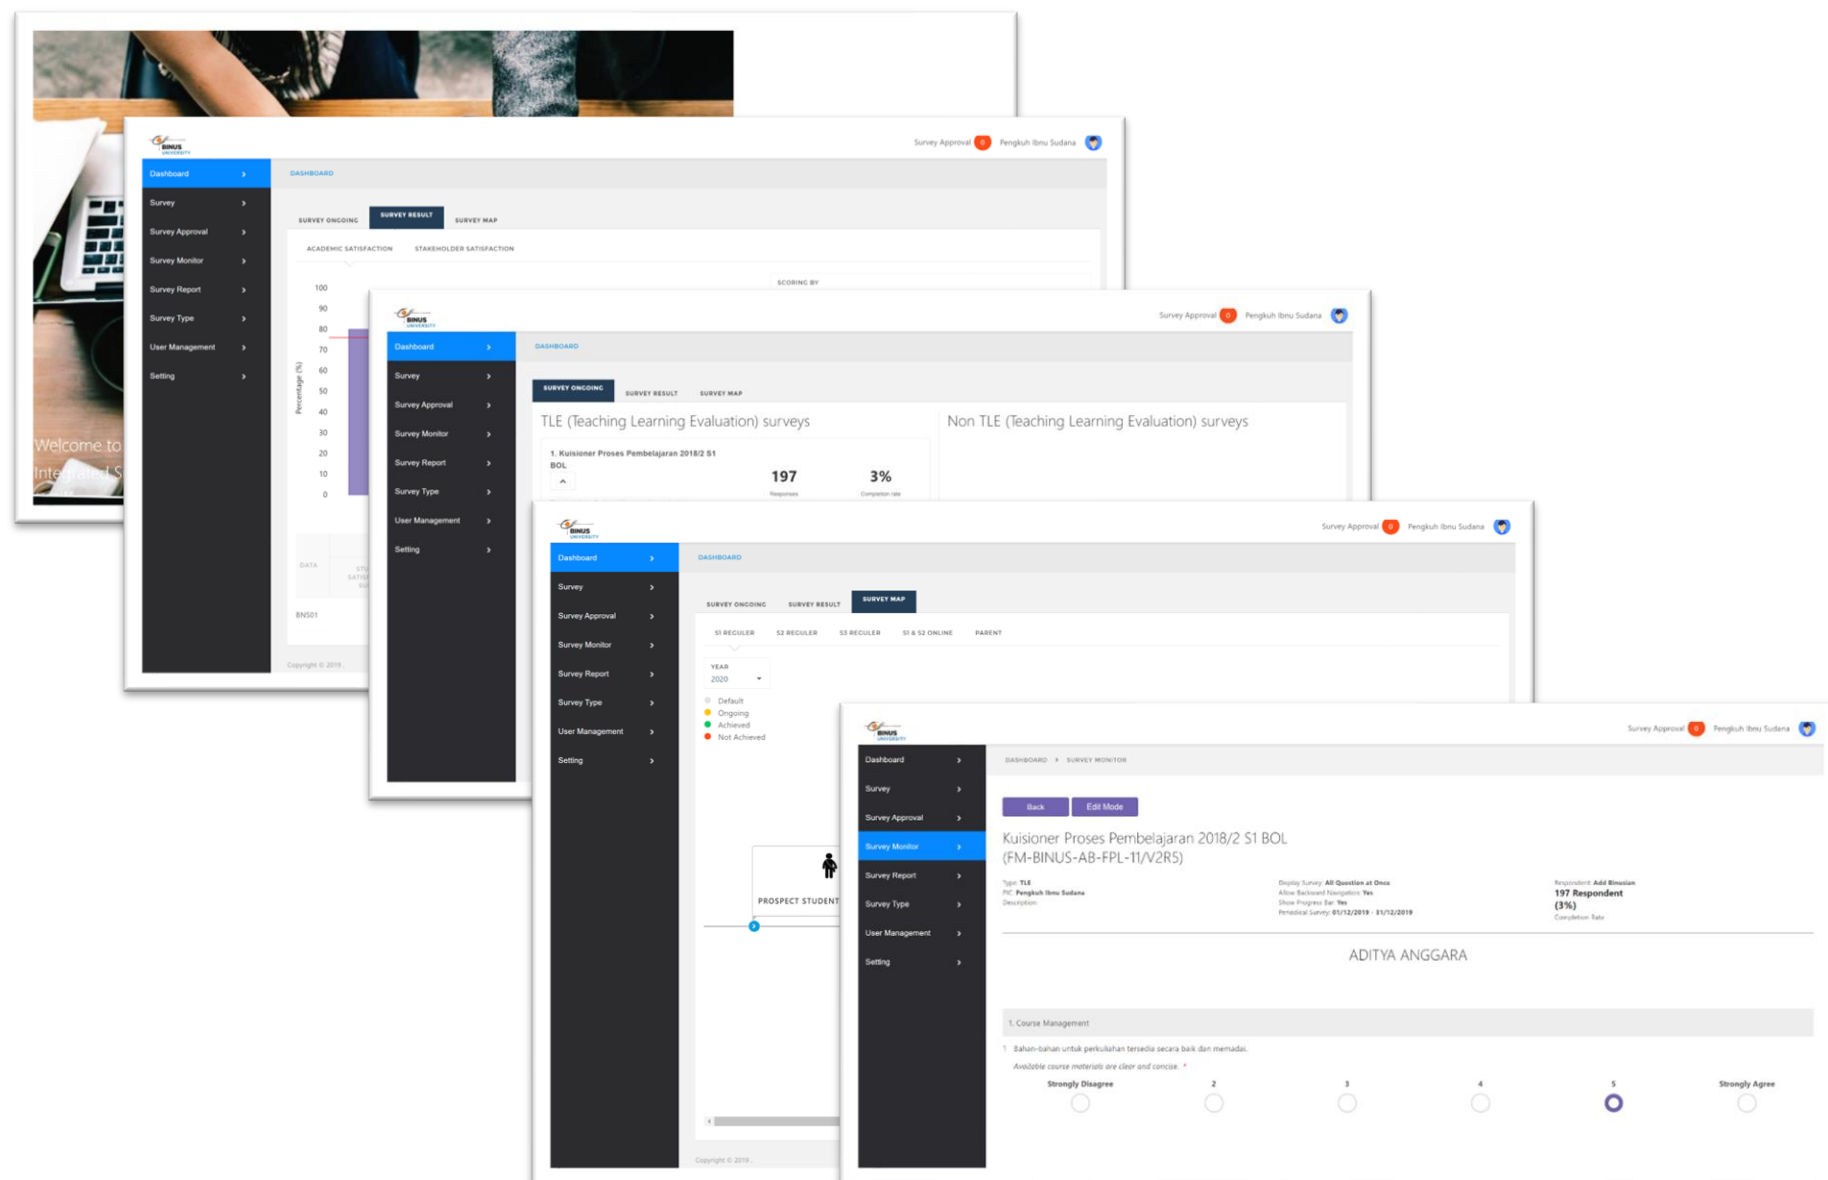

As used by

Binus Integrated Survey Reporting Application

The manual survey in the form of paper has been implemented for a long time and it is now the time to embrace the technology to increase the efficiency and simplicity also reduce the human error.

The survey creation and population are tough before and even after the survey is completed, the admin still faces the difficult step to summarize the responses. With an intelligent dashboard and reporting, the process of survey creation, respondent population, scoring, and even reporting has given Binus the simplicity.
